

MA Lighting Grand MA2 Full-Size Lighting Console

The GrandMA2 full-size represents MA Lighting's most powerful console, which puts on one platform the power to control conventional lights, moving lights, LED fixtures and media.

Equipped with the most up-to-date technology and even some special features (e.g. keyboard drawer and multi-touch command screen), the GrandMA2 is suitable for all lighting segments and supplies an intuitive and fast control of all connected fixtures and channels. Moreover the GrandMA2 full-size can read GrandMA 'series 1'-showfiles and is able to run in a special 'series 1'-mode. That means full compatibility with 'series 1'-sessions. And for yet easier operation, all command keys can be found in the same place on every console of the new series. The GrandMA2 offers extremely flexible and comfortable ways of programming, including nearly infinite numbers of presets, cues, pages, sequences and effects.

- Real-time control for up to 65,536 parameters per session in connection with MA NPU (equivalent to 256 DMX universes)
